## Abstracts

According to our (Global Info Research) latest study, the global Continuous Flow Optical Cryostat market size was valued at US\$ 128 million in 2024 and is forecast to a readjusted size of USD 213 million by 2031 with a CAGR of 7.5% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Continuous Flow Optical Cryostat is a device that uses liquid helium or liquid nitrogen as the refrigerant and maintains the low-temperature environment of the sample through the Continuous Flow of the refrigerant. It achieves temperature changes by delivering a small amount of low-temperature refrigerant to the sample area and controlling its temperature. The refrigerant can be stored in the main reservoir of the Dewar flask or continuously transferred from the storage Dewar flask.
