The continuous fruit juice pasteurizer is a high-efficiency sterilization equipment, mainly composed of a pretreatment system, a sterilization system and a cooling system, which can perform continuous high-temperature and short-time sterilization of liquid food, thereby ensuring product safety and quality. When using, the sterilized material goes through the cleaning and stirring process of the pretreatment system, enters the sterilizing system for high-temperature and short-term sterilizing treatment, then cools down through the cooling system, and finally discharges from the outlet. It has continuous sterilization, high-efficiency sterilization, and uniform sterilization, energy saving and environmental protection, and a wide range of applications.
