## Abstracts

A CGM provides continuous insight into glucose levels throughout the day and night. The device displays information about glucose direction and rate of change providing users additional information to help with their diabetes management.

Scope of the Report:

This report focuses on the Continuous Glucose Monitoring in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Rise in incidence of diabetes across the globe has elevated the need of innovative diabetic management devices, which has increased the adoption of continuous glucose monitoring (CGM) devices. The existing glucose monitoring devices have few gaps that are bridged by the innovative CGM. With CGM, significant improvement has been observed in stabilizing the elevated A1C levels, which in turn reduced the risk of developing long-term diabetic complications.

The worldwide market for Continuous Glucose Monitoring is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
