Abstracts

The global Continuous Level Measurement market size is expected to reach \$ 2608 million by 2032, rising at a market growth of 3.0% CAGR during the forecast period (2026-2032).

Continuous level measurement instruments monitor the levels of solids and liquids in silos, storage tanks, vessels, and other open or closed storage systems. These instruments differ from point level sensors in that they provide constant level measurement instead of only when the media reaches a specific level.

Europe held the main sale market share (about 27%) of the global continuous level measurement, other areas including China and United States held about 45% share in total.

In global continuous level measurement manufacturers market, ABB, E+H, Emerson Electric were the 3 main companies, occupied the market share with the proportion of 30% in total. In terms of product, differential pressure is the largest segment, with a share about 30%. And in terms of application, the largest application is chemicals, followed by oil & gas.

This report studies the global Continuous Level Measurement production, demand, key manufacturers, and key regions.
