## Abstracts

The global Continuous Monitoring and Response market size is expected to reach \$ 22080 million by 2032, rising at a market growth of 9.4% CAGR during the forecast period (2026-2032).

Continuous monitoring and response (CMRS) refers to a comprehensive security operations capability system that continuously and in real-time collects, analyzes, and correlates security telemetry data from IT, cloud, endpoints, networks, identities, applications, and OT environments, and performs immediate or near real-time detection, verification, response, and handling of potential threats, abnormal behaviors, and security incidents. Its core objective is to identify and block threats in the early stages of the attack chain, minimizing the time to detection (MTTD) and time to response (MTTR) of security incidents, thereby significantly reducing the risk of business interruption, data breaches, and operational costs.

### Gross Margin Level

The overall gross margin of continuous monitoring and response services is significantly higher than that of traditional IT operations outsourcing, but slightly lower than that of pure software subscriptions. Leading security vendors generally have a gross margin of 60%-75% for their overall security business, with subscription and platform revenues having even higher gross margins, consistently above 70%. Their managed detection and response businesses are also built on highly automated platforms, delivered at scale with relatively lean security operations teams. Therefore, the overall gross margin of continuous monitoring and response services like MDR/SOCaaS typically reaches 55%-65%, falling into the category of 'high-margin services.' In contrast, local MSSPs/integrators, which primarily operate with labor-intensive SOCs and have lower platform integration levels, have a gross margin of around 35%-50% for their continuous monitoring and response services, mainly limited by labor costs, 24/7 scheduling, and multi-regional delivery costs. With the widespread adoption of XDR

platforms, Automated Orchestration and Automation (SOAR), and AI-assisted analytics, there is still room for further optimization of industry gross margins. Highly platform-based global vendors are expected to stabilize service gross margins at around 60%, while the profitability pressure on purely human-intensive SOC models will continue to increase.

### Industry Drivers

The core drivers of the continuous monitoring and response market can be summarized into several main lines: First, the escalating threat landscape and the automation and AI-driven nature of attacks make it difficult for enterprises to cope with 24/7, multi-vector attacks using only 'point-based products + small internal teams,' driving them to outsource 24/7 monitoring and incident response to professional SOC/MDR vendors; Second, increasing compliance and regulatory pressures, with data protection laws, critical information infrastructure regulations, and cybersecurity disclosure requirements for listed companies in various countries mandating continuous monitoring, rapid reporting, and incident response capabilities; Third, a long-term shortage of security talent, with institutions such as Gartner predicting that global cybersecurity service spending will continue to grow at a double-digit rate from 2024 to 2026, a large portion of which will come from managed services and SOCaaS to fill skills gaps and improve resilience; Fourth, the normalization of cloudification and remote work, with hybrid cloud, multi-cloud, edge nodes, and BYOD significantly increasing the attack surface, driving enterprises to seek unified cloud-native monitoring and response platforms; Fifth, the increasing prevalence of cloudification and remote work, with hybrid cloud, multi-cloud, edge nodes, and BYOD significantly increasing the attack surface, driving enterprises to seek unified cloud-native monitoring and response platforms; Fifth, the increasing prevalence of cloudification and remote work, with hybrid cloud, multi-cloud, edge nodes, and BYOD significantly increasing the attack surface; Fifth, the increasing prevalence of cloud-native monitoring and response platforms. Enterprises are shifting from 'buying equipment/software' to 'buying results and operations.' More and more customers are signing contracts with service providers based on clearly defined business outcomes such as 'reduced Detection and Response Time (MTTD/MTTR), reduced critical incidents, and improved compliance pass rates,' rather than simply purchasing technology stacks. These factors combined have made 'continuous monitoring and response' one of the fastest-growing and most sticky segments of cybersecurity spending, also creating long-term opportunities for transformation from traditional MSSPs to MDR/SOCaaS, and further to more intelligent Agentic SOCs. This report studies the global Continuous Monitoring and Response demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Continuous Monitoring and Response, and provides market size (US\$ million) and Year-over-Year

(YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Continuous Monitoring and Response that contribute to its increasing demand across many markets.

### **Highlights and key features of the study**

Global Continuous Monitoring and Response total market, 2021-2032, (USD Million)

Global Continuous Monitoring and Response total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Continuous Monitoring and Response total market, key domestic companies, and share, (USD Million)

Global Continuous Monitoring and Response revenue by player, revenue and market share 2021-2026, (USD Million)

Global Continuous Monitoring and Response total market by Type, CAGR, 2021-2032, (USD Million)

Global Continuous Monitoring and Response total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Continuous Monitoring and Response market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Palo Alto Networks, Microsoft, CrowdStrike, IBM Security, Cisco, Accenture Security, Secureworks, AT&T Cybersecurity, Verizon Business, Orange Cyberdefense, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Continuous Monitoring and Response market

### **Detailed Segmentation:**

Each section contains quantitative market data including market by value (US\$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.

## Check Point

### Key Questions Answered

1. How big is the global Continuous Monitoring and Response market?
2. What is the demand of the global Continuous Monitoring and Response market?
3. What is the year over year growth of the global Continuous Monitoring and Response market?
4. What is the total value of the global Continuous Monitoring and Response market?
5. Who are the Major Players in the global Continuous Monitoring and Response market?
6. What are the growth factors driving the market demand?

6.2 Segment Introduction by Deployment Method

6.2.1 Cloud-based

6.2.2 On-premise

6.3 Market Segment by Deployment Method

6.3.1 World Continuous Monitoring and Response Market Size by Deployment Method (2021-2026)

6.3.2 World Continuous Monitoring and Response Market Size by Deployment Method (2027-2032)

6.3.3 World Continuous Monitoring and Response Market Size Market Share by Deployment Method (2027-2032)

## **7 MARKET ANALYSIS BY USER SCALE**

7.1 World Continuous Monitoring and Response Market Size Overview by User Scale: 2021 VS 2025 VS 2032

7.2 Segment Introduction by User Scale

7.2.1 Large Enterprise

7.2.2 SMEs

7.3 Market Segment by User Scale

7.3.1 World Continuous Monitoring and Response Market Size by User Scale (2021-2026)

7.3.2 World Continuous Monitoring and Response Market Size by User Scale (2027-2032)

7.3.3 World Continuous Monitoring and Response Market Size Market Share by User Scale (2027-2032)

## **8 MARKET ANALYSIS BY APPLICATION**

8.1 World Continuous Monitoring and Response Market Size Overview by Application: 2021 VS 2025 VS 2032

8.2 Segment Introduction by Application

8.2.1 BFSI

8.2.2 Government and Public Sector

8.2.3 Medical and Life Sciences

8.2.4 Others

## 8.3 Market Segment by Application

8.3.1 World Continuous Monitoring and Response Market Size by Application (2021-2026)

8.3.2 World Continuous Monitoring and Response Market Size by Application (2027-2032)
