Continuous positive airway pressure (CPAP) is a form of positive airway pressure ventilator, which applies mild air pressure on a continuous basis to keep the airways continuously open in people who are able to breathe spontaneously on their own.

Scope of the Report:

This report focuses on the Continuous Positive Airway Pressure Devices in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

One of the major drivers of the market is high prevalence of sleep disorders. It is estimated that over 350 million people worldwide suffer from sleep apnea. Thus, the increasing awareness of sleep apnea and associated comorbid conditions such as high blood pressure, and obesity have led to increased demand for sleep apnea diagnostic and therapeutic devices.

The continuous positive airway pressure devices market is currently dominated by the Americas, accounting for a market share of almost 59%, followed by the EMEA region and the APAC region. In the Americas, the US was the largest revenue contributor because of the increased diagnosis of sleep apnea in patients.
