Abstracts

The global Continuous Radon Monitor market size is expected to reach \$ 149 million by 2032, rising at a market growth of 3.3% CAGR during the forecast period (2026-2032).

In 2025, the global production of continuous radon gas monitors reached 94,645 units, with an average selling price of US\$1,225 per unit. The global annual production capacity of continuous radon gas monitors is approximately 150,000 units, with a gross profit margin of approximately 26.3%. A continuous radon gas monitor is an instrument used to continuously detect the concentration of radon gas in the environment. Radon (chemical symbol Rn) is a naturally occurring radioactive gas found in soil, rocks, and certain building materials. Prolonged exposure to high concentrations of radon may increase the risk of lung cancer. Therefore, continuous monitoring of radon gas is crucial in mining, construction, environmental monitoring, the nuclear industry, and residential environments. The upstream of the continuous radon gas monitor industry chain includes sensing and detection core components, gas and sample processing systems, etc.; the midstream consists of continuous radon gas monitor manufacturers; and the downstream mainly includes industries such as construction, geology, and environment.

The current market is driven by demand from fields such as nuclear energy, mining, geological disaster prevention, and indoor environmental monitoring. Products are increasingly miniaturized, emphasizing low power consumption, high sensitivity, and long-term stability. Equipment with online real-time monitoring, remote data transmission, and self-diagnostic capabilities is gradually becoming mainstream. With increased awareness of indoor and outdoor radon exposure risks and the improvement of regulations and standards, the market is showing a trend of both segmented applications and customized solutions. The improved cost-effectiveness of domestic

brands, global supply chain collaboration, and the expansion of after-sales service networks are also driving the market competition landscape to a higher level.

This report studies the global Continuous Radon Monitor production, demand, key manufacturers, and key regions.
