According to our (Global Info Research) latest study, the global Contract Abstraction Tool market size was valued at US$ 99 million in 2024 and is forecast to a readjusted size of USD 233 million by 2031 with a CAGR of 13.1% during review period.

Contract abstraction software, also known as Contracts are a crucial asset for every business. They help to define and govern the rights and duties of any new relationship or agreement. As a company grows, so does the complexity of its processes and the number of contracts that need to be managed.

Contract abstraction is the process in which a brief statement or a specific piece of information (such as dates or clauses) is abstracted. It is a legal process that highlights all the important terms, providing a window to the key information from the agreement. This summary is known as a contract abstract.

The global contract abstraction software market has been growing rapidly in recent years, primarily driven by increasing demand for efficient contract management solutions, advancements in AI and ML technologies, and the need for businesses to reduce legal risks and ensure compliance.Today, every business and organisation across the globe will sign and enter a vast number of contracts. They have become the norm in all business relationships. This, however, presents a problem – contract management doesn't end when the contract has been signed and the information that is needed to make informed business decisions resides in these signed contracts.

Contracts can seem confusing when they contain large amounts of legal jargon and unnecessarily long sentences. It makes the process of contract interpretation

significantly harder, more confusing, and slow; especially when it is carried out by someone outside of the business' legal team. At this point, contract abstraction becomes a necessary stage of the contract management process.

Contract abstraction plays an important role in law firms and businesses alike. It helps to digest long and complex documents, revamping them into a readable summary of key points. The process simplifies and facilitates the work of the legal team, while also allowing everyone in the business to understand and adhere to the contract.
