## Abstracts

The global Convector Electric Heater market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Convector electric heater is a type of electric heater that uses convection currents to heat a room. It consists of heating elements, usually made of metal, enclosed within a heat-resistant housing. The heater warms the air surrounding it, which then rises, creating a natural circulation of warm air within the room. Convector heaters are known for their efficiency and quick heating capabilities, making them suitable for use in homes, offices, or other indoor spaces as a supplemental or primary heating source.
