In many contexts, industrial conveyor systems are used for little more than transferring a product or material from point A to point B. For some applications, though, conveyor systems are integral to the production process, providing a tool that's essential to how a new product takes shape. Parts cooling and drying conveyors in the plastics industry are a great example of the latter. Plastic products often require high heat to be manufactured; this means they also need time and space to cool off, preferably as quickly as possible.
