Abstracts

Conveyor ovens refer to ovens which are used in the food service industry and comprise one or more belts to efficiently move the food product through a heated chamber.

Scope of the Report:

This report focuses on the Conveyor Ovens in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

In terms of geography, North America accounted for the maximum market share and will continue to dominate the market for the next few years. One of the major factors responsible for the maximum share of revenue generation from this region is the large number of new restaurants that serve high demand food products like pizza, subs, sandwiches, and cookies.

Electric conveyor ovens segment accounted for the maximum market share and will continue to dominate the market for the next few years. One of the major factors responsible for the market segment's growth is the increasing demand for electric conveyor ovens because they are easy to use and operators need not worry about lighting the gas or carbon monoxide leakage issue.

The restaurant segment accounted for the maximum market share and will continue to dominate the market for the next few years. One of the major factors responsible for the market segment's growth is the increasing demand for the conveyor oven at pizzerias.

The worldwide market for Conveyor Ovens is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in

2017, according to a new GIR (Global Info Research) study.
