Cooked Meat Products refer to meat products that have undergone heat processing and can be consumed directly without further cooking or reheating. These products are typically made from beef, pork, and poultry (such as chicken, duck, and goose) as the main raw materials. Through scientific processing techniques, the meat is cooked, sterilized, and developed with distinctive flavors. Cooked Meat Products combine convenience with rich taste, making them popular ready-to-eat foods in today's fast-paced lifestyle.

The processing of Cooked Meat Products generally includes various heat treatments such as boiling, steaming, roasting, braising, and marinating. Heating ensures that the meat is fully cooked and food safety is maintained. During processing, seasonings, spices, and food auxiliaries may be added as needed to enhance flavor and texture. Heat-processed meat products not only retain the nutritional value of the meat but also offer unique flavors, easy storage, and ready-to-eat convenience.

Cooked Meat Products are widely used in households, the catering industry, takeout services, and retail markets. In homes, they can serve as convenient ready-to-eat foods or as ingredients for cooking. In restaurants, they are often used as dish components or quick-serve products. In retail and supermarkets, they are sold in vacuum-packed, refrigerated, or frozen forms, meeting consumer demands for convenience, taste, and safety.
