Abstracts

The global Cookie Dough market size is expected to reach \$ 22743 million by 2032, rising at a market growth of 6.2% CAGR during the forecast period (2026-2032).

Cookie dough refers to a prepared mixture of flour, fats, sweeteners, and additional ingredients such as chocolate chips or flavorings, used for baking cookies or consumed as ready-to-eat dessert products. It is supplied in refrigerated, frozen, and shelf-stable formats to household consumers, bakeries, foodservice operators, and dessert brands. From a value chain perspective, upstream activities include wheat flour, sugar, fats, dairy ingredients, and flavor inclusions, midstream processes focus on dough formulation, mixing, portioning, freezing or chilling, and packaging, while downstream demand is driven by retail consumers, industrial bakeries, foodservice operators, and private-label dessert brands. In 2025, the average selling price of cookie dough is approximately US\$4.2 per kilogram, with global sales volume reaching around 3.45 million metric tons. The industry maintains a gross margin of 35%–55%, supported by standardized production, brand differentiation, high consumption frequency, and expanding demand for convenient and indulgent bakery products.

Industry analysis indicates that cookie dough products are evolving from basic baking ingredients toward diversified ready-to-bake and ready-to-eat dessert solutions. Growth is increasingly driven by flavor innovation, clean-label formulations, and expansion in foodservice and specialty dessert channels rather than traditional home baking alone.

This report studies the global Cookie Dough production, demand, key manufacturers, and key regions.
