## Abstracts

According to our (Global Info Research) latest study, the global Coolant Control Valves market size was valued at USD 169.8 million in 2023 and is forecast to a readjusted size of USD 320.3 million by 2030 with a CAGR of 9.5% during review period.

Coolant Control Valves also known as coolant flow control valves, which are needed inside this system for shutting off the coolant flow, switching over coolant circuits and regulating the coolant flow. The valve enables functions for decreasing the engine warm up time through “engine zero flow”, enabling faster cabin warm up by directing the heat to the heat exchanger core and in- or decreasing the coolant flow for an optimized engine temperature.

Global top 3 manufacturers of coolant control valves are MSG, Rheinmetall Automotive and MIKUNI. These 3 companies account for about a third of global market share in total. Geographically speaking, Asia-Pacific is the largest market, accounting for over half of total market share, followed by Europe with over 25% share. In terms of type, 3 way segment holds an important share of over 60%. In terms of application, passenger cars holds a dominant share of over 75%.
