Cooling polyester yarn refers to a type of polyester yarn that is treated or engineered to have cooling properties. The yarn is typically designed to wick away moisture from the body, allowing for faster evaporation, which creates a cooling effect. This technology is often used in athletic or outdoor clothing, where maintaining a comfortable body temperature is important. The cooling effects of these yarns are achieved through various methods, such as incorporating specific fibers or additives that enhance moisture management and breathability. By promoting faster moisture evaporation, cooling polyester yarn can help keep the wearer cool and comfortable in hot or humid conditions.
