The global Cooling Towers market size is expected to reach \$ 4480.9 million by 2029, rising at a market growth of 4.0% CAGR during the forecast period (2023-2029).

Global key manufacturers of cooling towers include Baltimore Aircoil Company (BAC), SPX Cooling Technologies, EVAPCO, and Seagull cooling. The top three producers together hold about 25% of the market share, with the largest producer being BAC at 12%. The global origins are mainly located in the United States, Europe, South America, China, Japan, India, and Korea. In terms of product category, it is divided into open-circuit cooling towers and closed-circuit cooling towers, with the former holding a major market share of 65%. In terms of applications, power generation is the number one application area with a 25% market share; in addition, HVAC, oil and gas are also important applications.

A cooling tower is a specialized heat exchanger in which air and water are brought into direct contact with each other in order to reduce the water's temperature. As this occurs, a small volume of water is evaporated, reducing the temperature of the water being circulated through the tower.
