The global Cooling Yarn market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Cooling yarn is a type of textile material that is designed to provide a cooling effect to the wearer. The purpose of cooling yarn is to regulate the body temperature by wicking away moisture and heat from the skin, allowing for increased airflow and evaporation. This can help to keep the body cool and comfortable, especially in hot and humid conditions or during physical activities. Cooling yarn often incorporates features such as moisture-wicking properties, breathability, and drying capabilities.
