## Abstracts

Copier, also called photocopier, copy machine, photocopy machine, copier machine, or photocopying machine, a device for producing copies of text or graphic material by the use of light, heat, chemicals, or electrostatic charges. Copiers are widely used in business, education and government agencies. Standalone copiers are geared more towards mass document production, where users expect their devices to churn out hundreds or thousands of copies at a time. Multifunction copiers, also known as multifunction or all-in-one printers, refer to a device that prints documents as well as a number of other functions, including copying, scanning, and printing. Standalone copiers have their merits, especially when it comes to speed and simplicity. However, multifunction copiers offer greater flexibility for companies looking to streamline user workflows, save office space, and consolidate equipment that would otherwise be spread throughout multiple departments.

This report studies the global Copiers production, demand, key manufacturers, and key regions.
