Abstracts

The global Copiers market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

In United States, key manufacturers of copiers include Xerox, Canon, Ricoh, etc. The top three players hold a share around 58%. Copiers in United States market are mainly produced in Japan and North America, they occupied for a share about 99 percent.

Copier, also called photocopier, copy machine, photocopy machine, copier machine, or photocopying machine, a device for producing copies of text or graphic material by the use of light, heat, chemicals, or electrostatic charges. Copiers are widely used in business, education and government agencies. In this report, both standalone copiers and multifunction copiers are included. Standalone copiers are geared more towards mass document production, where users expect their devices to churn out hundreds or thousands of copies at a time. Multifunction copiers, also known as multifunction or all-in-one printers, refer to a device that prints documents as well as a number of other functions, including copying, scanning, and printing. Standalone copiers have their merits, especially when it comes to speed and simplicity. However, multifunction copiers offer greater flexibility for companies looking to streamline user workflows, save office space, and consolidate equipment that would otherwise be spread throughout multiple departments.

This report studies the global Copiers production, demand, key manufacturers, and key regions.
