According to our (Global Info Research) latest study, the global Copper-Aluminum Brazing Paste market size was valued at US\$ 975 million in 2025 and is forecast to a readjusted size of US\$ 1276 million by 2032 with a CAGR of 3.9% during review period.

Copper-aluminum brazing paste is a paste-form brazing material primarily composed of copper, aluminum, and fluxing metal powders. Containing an integrated flux, it enables high-strength bonding between copper and aluminum metal surfaces at low temperatures. It is widely utilized in the brazing of various metal components, such as heat sinks, air conditioners, and electronic devices.

Upstream: Suppliers of copper powder, aluminum powder, flux, and organic carriers provide the necessary raw materials. Downstream: Manufacturers of metal components?including heat sinks for electronics and appliances, air conditioning and refrigeration systems, automotive radiators, and industrial piping?utilize copper-aluminum brazing paste for welding and assembly, thereby constituting the market for finished and semi-finished products. Globally, the average unit price for copper-aluminum brazing paste stands at \$7,021 per ton, with an annual sales volume of approximately 135,000 tons. The global production capacity is 150,000 tons, and the industry profit margin is 15%.
