According to our (Global Info Research) latest study, the global Copper Solvent Extraction Reagent market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

Compared with traditional pyrometallurgy, hydrometallurgy has the advantages of lower energy consumption, less pollution, user-friendly operation, and higher metal purification efficiency. In the future, hydrometallurgy is expected to replace pyrometallurgy and become the mainstream of metallurgical processes. The demand for copper extractants, as the core auxiliary agent for hydrometallurgical processes, will also increase accordingly. In addition, with the acceleration of global industrialization, especially the development of new energy industries such as electric vehicles and wind power that use a large amount of copper, it will also promote a significant increase in the demand for copper extractants.
