The cordless autofeed screw gun is an efficient and convenient power tool designed for large-scale screw installation tasks, such as drywall, flooring, and woodworking assembly applications. The tool combines a cordless design with an automatic feeding system to continuously feed screws without the need to manually place them one by one, greatly improving construction efficiency and reducing operator fatigue. It is usually equipped with a brushless motor, which provides longer battery life and higher power, while supporting adjustable torque and depth control to ensure that each screw is accurately fixed. In addition, modern cordless autofeed screw guns mostly use lithium battery technology, which supports fast charging and long working hours, and are widely used in professional construction, decoration industry and DIY projects.
