The global Cordless Paint Spray Gun market size is expected to reach \$ 797.3 million by 2029, rising at a market growth of 5.5% CAGR during the forecast period (2023-2029).

Rapid industrialization and increasing applications in the household and commercial sectors are primarily driving the cordless paint spray gun market. The growth in the use and demand for Li-ion batteries, along with the rise in infrastructural development, has surged the demand for paint sprayers. The cordless paint spray gun is a device that helps in painting a surface evenly with paint or similar liquids. It can be used for painting several surfaces, such as wood, metal, brick, and many more. The demand for paint sprayers is majorly driven by the industries such as automobile, manufacturing, construction, and marine. In addition, the rising trend of DIY (Do it Yourself) projects are anticipated to drive the paint sprayer market. The market is segmented into product, power source, applicator type, and end-user.

A cordless paint spray gun offers one of the most convenient solutions for painting. These devices are handheld spray paint guns that don't require a cord or external power source. The battery paint sprayer includes a paint canister and its own independent power source. These can be used to efficiently paint over any difficult to reach area.
