Cordless pruning chainsaw is a portable, battery-powered small chain saw specially designed for pruning branches, fruit trees, shrubs and garden plants. It uses lithium batteries as a power source, free from the fuel restrictions of traditional gasoline chainsaws and the power cord constraints of electric chainsaws, and is flexible and safe to operate. Cordless pruning chainsaws are usually light, low-noise, and low-vibration, suitable for home gardening, orchard management, urban greening and other scenes that require precise pruning. It has the characteristics of fast start-up and easy maintenance. The length of the knife chain is mostly 4 to 8 inches, which can not only prune small branches, but also has the ability to handle medium-diameter branches. Due to its environmental protection, convenience and low operating threshold, cordless pruning chainsaws have become increasingly popular among amateur gardeners and professional greening personnel in the global market in recent years.
