A finish sander is a power tool designed for fine sanding and smoothing wood, metal or plastic surfaces. It usually has a high-frequency vibration function, which uses a rapid reciprocating motion to make the sandpaper contact the surface of the workpiece, removing small surface flaws, old paint or dirt to achieve a smooth effect. The cordless random orbital sander is a portable power tool powered by a rechargeable battery and designed for efficient and smooth surface sanding. It combines random orbital motion with rotary motion to achieve a smooth sanding process without swirl marks, and is suitable for finishing a variety of materials such as wood, metal and plastic. The cordless design increases its flexibility and convenience, and is particularly suitable for situations where you need to work in an environment without an electrical outlet, such as outdoors or sanding large surfaces. Sanders are often used in furniture making, decoration and finishing work to ensure that the surface of the workpiece reaches the desired finish.
