Cordless tube belt sander is a portable electric grinding tool designed for polishing, deburring or trimming the surface of cylindrical workpieces such as metal pipes, railings, handrails, etc. The device adopts a working structure with a 360-degree wrapping of the annular sanding belt around the tube, combined with an adjustable belt guide arm system to achieve uniform and efficient full-circle grinding. The cordless design relies on lithium battery power to avoid the operating limitations of traditional wired equipment in narrow or high-altitude operations, significantly improving flexibility and safety. It is widely used in stainless steel processing, metal decoration, industrial maintenance and building installation. Some high-end models are also equipped with stepless speed change and overload protection functions to meet the needs of different materials and working conditions.
