## Abstracts

According to our (Global Info Research) latest study, the global Cordless Ultrasonic Dissector market size was valued at US\$ 3.1 million in 2024 and is forecast to a readjusted size of USD 4.4 million by 2031 with a CAGR of 4.5% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

The cordless ultrasonic dissector is a new generation of ultrasonic dissectors, which usually adopts a hostless design and a split design, and has the advantages of low failure rate, low maintenance cost, and good durability. The design of the cordless ultrasonic dissector abandons the need for an independent host and integrates all functions into the handle of the ultrasonic scalpel. This design can reduce hospital procurement costs and simplify the operation process in application scenarios.
