The cordless variable speed polisher is a versatile tool that is mainly used for grinding, polishing and waxing various surfaces. Its core feature is the adjustable rotation speed. By adjusting the speed to adapt to different materials and task requirements, the machine is usually equipped with a rotating disk, which can be equipped with polishing pads or sandpaper of different materials to meet the needs from rough surface repair to fine polishing. The variable speed function allows users to quickly remove materials at high speeds, or perform fine grinding at low speeds to reduce heat generation and surface damage. This type of equipment is widely used in automotive detailing, woodworking, metalworking and other industrial fields, emphasizing efficiency and surface quality.
