Abstracts

The global Coreless DC Motors market size is expected to reach \$ 1288.6 million by 2029, rising at a market growth of 7.6% CAGR during the forecast period (2023-2029).

Global key players of coreless DC motors include Faulhaber, Portescap, Allied Motion Technologies, Maxon Motor, Nidec Copal Corporation, etc. The top five players hold a share about 67%. China is the largest producer, has a share about 56%, followed by Europe and North America, with share 15% and 11%, respectively. The largest market is Asia-Pacific, with a share about 49%, followed by Europe and North America, with share 25% and 20%, separately.

A coreless motor is a brushless or brushed motor with a coil wound on itself and not on iron. For this reason, it is also called ironless. The winding of coreless motors has a typically 'oblique' or 'honeycomb' design to create a dense, self-supporting weave that is then held in place with the use of epoxy resin. In brush motors, the stator is composed of rare earth magnets and is located in the most internal part of the motor, while for brushless motors the magnet, always internal, is the rotor part.

This report studies the global Coreless DC Motors production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Coreless DC Motors, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
