## Abstracts

According to our (Global Info Research) latest study, the global Coreless Winder market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

A coreless winder is a device used for winding various materials, such as wire, cable, yarn, or tape, without the need for a central core or spool. Unlike traditional winding methods that require a core or spool, coreless winders directly wind the material onto itself, creating a compact and self-contained package.

Coreless winders find applications in various industries, including wire and cable manufacturing, textile and yarn production, packaging, film and tape winding, and many other industries that require efficient and compact winding solutions.
