## Abstracts

The global Corn-Based Ethanol Fuel market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

As a biofuel, the market size of corn-based pure ethanol fuel is growing year by year. The main growth factors include: 1. Government support. Governments of various countries have been supporting biofuels, especially corn-based ethanol fuel. 2. Ethanol fuel is considered as an alternative to chemical rock because it can be produced by growing and collecting large quantities of corn. 3. Supported by automobile manufacturers, the application of ethanol fuel is supported by automobile manufacturers, and many automobile manufacturers have developed automobiles that can use corn-based ethanol fuel. 4. The production and supply plan of corn-based refined ethanol fuel is undergoing changes, and more companies choose to establish cooperative relationships with farmers and growers to ensure a more sustainable and reliable material source.

Corn-based ethanol fuel is a renewable and sustainable fuel made from corn. It is a biofuel produced by fermenting corn kernels with yeast and enzymes to convert them into ethanol. Corn-based ethanol fuel is used as a substitute for gasoline in cars and other vehicles.
