According to our (Global Info Research) latest study, the global Corn Fiber Gum market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

The corn fiber gum is an emulsifier produced from the waste corn fiber. The corn fiber gum can widely be used as an alternative to acacia gum as acacia gum is costly to import and it is produced in countries which are politically disturbed and unregulated in terms of the market. The corn fiber gum is a lot cheaper to produce and export, as the corn fiber is easily available in different sectors, where corn cob is used as a primary product.

A pound of waste corn fiber cost less than a dollar in Northern America. The corn fiber gum market is a new scope in the pharmaceutical and food & beverage market. Due to a recent breakthrough in the field of the targeted medicine, the corn fiber gum can be used as the carrier for medicines. As an emulsifier, a single unit of corn fiber gum can hold oil droplets use for flavoring and aroma, more than 15 times than the average emulsifiers present in the market. The global food additive market value is shooting rocket high and a new and cheaper product in the market will surely create a good business opportunity.
