Abstracts

Coronary artery bypass surgery, also known as coronary artery bypass graft (CABG, pronounced 'cabbage') surgery, and colloquially heart bypass or bypass surgery, is a surgical procedure to restore normal blood flow to an obstructed coronary artery. A normal coronary artery transports blood to and from the heart muscle itself, not through the main circulatory system.

Scope of the Report:

This report focuses on the Coronary Artery Bypass Grafts (CABG) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The availability of favorable reimbursement policies for medical devices as one of the primary growth drivers for the global coronary artery bypass graft (CABG) market.

The coronary artery bypass graft (CABG) market is experiencing considerable growth in the Americas due to the increasing prevalence of diseases such as coronary artery disease (CAD), cardiovascular diseases (CVD), stroke, and peripheral artery disease (PAD).

A large number of patients highly prefer hospitals over other healthcare centers because hospitals extensively perform complex procedures such as CABG, which involves the placement of a graft inside the body.

The worldwide market for Coronary Artery Bypass Grafts (CABG) is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
