Abstracts

Corporate Clothing or Uniforms & Workwears is defined as apparel bought by enterprises/institutions which given to their employees to perform their work. Often those employed within trade industries elect to be outfitted in Uniforms & Workwears because it is built to provide durability and safety.

SCOPE OF THE REPORT:

At present, the production of corporate clothing is distributed evenly in China, Southeast Asia, South Asia, Southern Europe, Central America and Turkey. China still is the largest production country of corporate clothing in the world in the past few years and it will keep the same position in the next few years. European and American manufacturers mainly manufacture high quality corporate clothing, special protective clothing and fashion clothes. Or some international giants such as VF transfer production bases to the rest of the world. This industry is a labor-intensive industry, and it is difficult for local manufacturers in Europe and the United States to compete with low-priced products.

The worldwide market for Corporate Clothing is expected to grow at a CAGR of roughly 4.2% over the next five years, will reach 66600 million US\$ in 2024, from 54200 million US\$ in 2019, according to a new GIR (Global Info Research) study.

This report focuses on the Corporate Clothing in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
