According to our (Global Info Research) latest study, the global Correction Tape and Correction Fluid market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Correction tape is an alternative to correction fluid used to correct mistakes during typing, or, in some forms, handwriting. One side of the tape, which is placed against the area to cover, is coated in a white, opaque masking material. Pressure applied to the other side of the tape transfers this material to the paper. Unlike correction fluid, the covered area can be written on it immediately after applying. As it is solid, correction tape is not subject to misuse as an inhalant, unlike most correction fluids.
