Abstracts

The global Correction Tape and Correction Fluid market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

Correction tape is an alternative to correction fluid used to correct mistakes during typing, or, in some forms, handwriting. One side of the tape, which is placed against the area to cover, is coated in a white, opaque masking material. Pressure applied to the other side of the tape transfers this material to the paper. Unlike correction fluid, the covered area can be written on it immediately after applying. As it is solid, correction tape is not subject to misuse as an inhalant, unlike most correction fluids.

This report studies the global Correction Tape and Correction Fluid production, demand, key manufacturers, and key regions.
