Abstracts

Contact lenses are thin lenses placed directly on the surface of the eye to correct vision or for therapeutic purposes.

Scope of the Report:

This report focuses on the Corrective Contact Lenses in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The soft contact lenses segment accounted for the major shares of the corrective contact lens market. The presence of materials such as silicone hydrogel in the soft contact lenses allow oxygen to pass through the eye cornea and enable high water retention, making them extremely comfortable for prolonged wear.

This market study estimates that in terms of geographic regions, the Americas will be the major revenue contributor to the market. The market in the region is largely driven by the rise in awareness of the uses of lenses in enhancing the aesthetic appeal and aiding in vision correction. Additionally, the expected rise in the number of middle-aged and senior consumers in this region will also boost the growth of this market during the forecast period.

The worldwide market for Corrective Contact Lenses is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
