## Abstracts

According to our (Global Info Research) latest study, the global Corrosion Control Program market size was valued at US\$ 2257 million in 2025 and is forecast to a readjusted size of US\$ 3326 million by 2032 with a CAGR of 5.7% during review period.

To address the problems of traditional corrosion protection methods being singular, passive, uncontrollable in effectiveness, and costly to maintain, modern corrosion control solutions have emerged. Since the mid-20th century, when corrosion science developed a systematic theory, this field has become increasingly sophisticated with the advancements in materials science, electrochemistry, and monitoring technologies. Currently, corrosion control solutions have evolved into a comprehensive engineering system encompassing corrosion risk assessment, material selection, cathodic/anodic protection, high-performance coatings, corrosion inhibitor application, structural health monitoring, and intelligent early warning. These solutions are widely used in marine engineering, energy and chemical industries, transportation, infrastructure, and military equipment, becoming a key engineering technology service capable of proactively predicting, precisely protecting, extending facility lifespan, ensuring safe operation, and significantly reducing total life-cycle costs.

As a crucial support for industrial safety and efficiency, corrosion control solutions are undergoing a profound transformation from 'passive maintenance' to 'proactive prevention.' The market has significant growth potential, but it faces multiple challenges, including technological iteration, cost control, and compliance risks. Enterprises need to leverage technological innovation, service upgrades, and ecosystem building to seize the opportunities presented by global industrial upgrading, environmental policy initiatives, and smart factory construction, achieving high-quality development and

providing a solid guarantee for the green, intelligent, and long-term efficient operation of global industrial equipment.
