Abstracts

The global Corrugated Plastic Board market size is expected to reach \$ 5345 million by 2032, rising at a market growth of 7.0% CAGR during the forecast period (2026-2032).

Corrugated plastic is usually made from polypropylene which is capable of being recycled. Fluted (corrugated) Polypropylene (PP) sheet, a polyolefin product, is a lightweight, material known for its versatility across many industries and applications. Fluted PP is used in Graphic Arts, Packaging, Agriculture, Automotive and Industrial markets. Common applications include signage, trade show and retail display, binding/stationary, crates, as separators or liners in packaging, vehicle trunk liners, and more. Sturdy, reusable, recyclable, returnable, waterproof fluted polypropylene shipping containers are superior to corrugated paper. Polypropylene offers good resistance to chemical or acid attacks and has low moisture absorption and superior electrical insulation. Corrugated plastic board (also known as corrugated plastic cardboard, corrugated plastic board sheets, coroplast sheets, waterproof cardboard, corrugated stratocore sheets) are 2 outside flat plastic sheets separated by small plastic beams running perpendicular to them. Corrugated plastic sheets come in a wide variety of colors and thicknesses. They can be fire retardant or non-fire retardant.

Global Corrugated Plastic Board key players include Coroplast (Inteplast Group), Primex Plastics, Karton, SIMONA, DS Smith, etc. Global top five manufacturers hold a share about 10%. Europe is the largest market, with a share about 30%, followed by North America, with a share about 25 percent. In terms of product, Polypropylene Type is the largest segment, with a share about 85%. And in terms of application, the largest application is Packaging and Storage, followed by Graphic Arts and Signage, Building and Construction, Automotive, Agriculture, etc.
