Abstracts

Cosmetic dentistry is a method of professional oral care that focuses on improving the appearance of your mouth, teeth and smile.

SCOPE OF THE REPORT:

Conditions in the global economy, the products markets and the financial markets may adversely affect business and financial statements.

The business is sensitive to general economic conditions. Slower global economic growth, actual or anticipated default on sovereign debt, volatility in the currency and credit markets, high levels of unemployment or underemployment, reduced levels of capital expenditures, changes in government fiscal and monetary policies, changes in capital requirements for financial institutions, government deficit reduction and budget negotiation dynamics, sequestration, austerity measures and other challenges that affect the global economy adversely affect the company and its distributors, customers and suppliers, including having the effect of:

- reducing demand for the products and services, limiting the financing available to our customers and suppliers, increasing order cancellations and resulting in longer sales cycles and slower adoption of new technologies;
- increasing the difficulty in collecting accounts receivable and the risk of excess and obsolete inventories;
- increasing price competition in the served markets;
- supply interruptions, which could disrupt the ability to produce our products;
- increasing the risk of impairment of goodwill and other long-lived assets, and the risk that we may not be able to fully recover the value of other assets such as real estate and tax assets; and if growth in the global economy or in any of the markets we serve

slows for a significant period, if there is significant deterioration in the global economy or such markets or if improvements in the global economy don't benefit the markets we serve, our business and financial statements could be adversely affected. The growth depends in part on the growth of the markets which are served, and visibility into our markets is limited (particularly for markets into which we sell through distribution). Every company faces intense competition and if anyone is unable to compete effectively, it may experience decreased demand and decreased market share.

For the above risks to a player in this industry, we analysis the global economic conditions and the technology trends and get the following conclusions:

- I The global will grow stably at the compound rate of 4.32%;
- I The demands of the consumers for cosmetic dentistry products will grow at the rate of 3.46% with a bit fluctuation;
- I The technology will be the main factors in the competitive activities;
- I The China and some Asia countries will be the emerging markets of the cosmetic dentistry products.

The worldwide market for Cosmetic Dentistry is expected to grow at a CAGR of roughly 2.4% over the next five years, will reach 17600 million US\$ in 2024, from 15300 million US\$ in 2019, according to a new GIR (Global Info Research) study.
