Abstracts

According to our (Global Info Research) latest study, the global Cosmetics Development and Formulation market size was valued at US\$ 11216 million in 2025 and is forecast to a readjusted size of US\$ 16744 million by 2032 with a CAGR of 6.0% during review period.

Cosmetics Development and Formulation is an integrated R&D and engineering process focused on designing and optimizing cosmetic products through systematic formulation development, ingredient interaction control, performance validation, and regulatory compliance management across skincare, haircare, and body care applications. It combines functional ingredient selection, formulation architecture design, sensory evaluation, and stability testing to deliver safe, effective, and consumer-oriented cosmetic solutions with differentiated performance characteristics. Its advantages include high formulation flexibility, rapid innovation cycles, strong product differentiation capability, and close alignment with evolving consumer preferences and dermatological insights. In 2025, the industry's average gross margin was approximately 28%. The upstream primarily consists of base ingredients such as oils, emulsifiers, and humectants, along with R&D equipment and testing reagents, with representative suppliers including BASF, Croda, Evonik, and Ashland. The midstream focuses on formulation design, laboratory testing, efficacy evaluation, regulatory compliance, and pilot-scale production. The downstream mainly includes skincare products, haircare products, and body care products, with representative customers including L'Oréal, Estée Lauder, Procter & Gamble, Unilever, and Shanghai Jahwa.

Cosmetics Development and Formulation is evolving under the combined influence of personalized skincare demand, functional ingredient innovation, and stricter regulatory

frameworks. Application scenarios are expanding from traditional skincare, haircare, and body care into targeted dermatological solutions, including sensitive skin repair, anti-aging systems, and microbiome-balancing products. This shift is pushing formulation work toward higher scientific density, requiring deeper integration of bioactive materials, delivery technologies, and clinical validation. At the same time, sustainability requirements are reshaping ingredient selection and process design. However, rising R&D complexity, longer validation cycles, and cost constraints continue to pressure development efficiency and speed-to-market dynamics.

This report is a detailed and comprehensive analysis for global Cosmetics Development and Formulation market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Cosmetics Development and Formulation market size and forecasts, in consumption value (\$ Million), 2021-2032

Global Cosmetics Development and Formulation market size and forecasts by region and country, in consumption value (\$ Million), 2021-2032

Global Cosmetics Development and Formulation market size and forecasts, by Type and by Application, in consumption value (\$ Million), 2021-2032

Global Cosmetics Development and Formulation market shares of main players, in revenue (\$ Million), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Cosmetics Development and Formulation

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Cosmetics Development and Formulation market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include ANC Corporation (South Korea), Ancorotti Cosmetics (Italy), ANTE Cosmetics (China), Bawei Bio-Technology (China), BioTruly Company (China), Chromavis S.p.A (Italy), CNF (South Korea), Cosmecca Korea (South Korea), Cosmo Beauty (Japan), Voyant Beauty (USA), etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market segmentation

Cosmetics Development and Formulation market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for Consumption Value by Type and by Application. This analysis can help you expand your business by targeting qualified niche markets.

Market segment by Type

Formulation and Testing

Sales and Marketing

Market segment by Cycle Time

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope

1.2 Market Estimation Caveats and Base Year

1.3 Classification of Cosmetics Development and Formulation by Type

1.3.1 Overview: Global Cosmetics Development and Formulation Market Size by Type:
2021 Versus 2025 Versus 2032

1.3.2 Global Cosmetics Development and Formulation Consumption Value Market
Share by Type in 2025

1.3.3 Formulation and Testing

1.3.4 Sales and Marketing

1.4 Classification of Cosmetics Development and Formulation by Cycle Time

1.4.1 Overview: Global Cosmetics Development and Formulation Market Size by Cycle
Time: 2021 Versus 2025 Versus 2032

1.4.2 Global Cosmetics Development and Formulation Consumption Value Market
Share by Cycle Time in 2025

1.4.3
