## Abstracts

The global Cosmetics Dispensing Pump market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

As consumers become more aware of healthy lifestyles, the global demand for hair and skin care products is expected to increase. Dispensing pumps are commonly used to dispense antiperspirant, perfume, cosmetics, shampoo, soap, sunscreen, and toothpaste. The high emphasis on hygiene and safety has brought distribution pumps into the spotlight.

Dispensing pumps comprise pistons, pump heads, and collars. The pumps are intended to offer varied liquid outputs to the user in a single application. They work well with viscous materials including lotions, liquid soaps, water, and shampoos, as well as pharmaceutical, cosmetic, and other health and beauty items. Dispensing pumps are resistant to corrosion and chemicals due to the recyclable and highly durable materials used in them.
