According to our (Global Info Research) latest study, the global Counter Current Wet Drum Magnetic Separator market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Counter-current wet drum magnetic separator is a machine used for the extraction and separation of magnetic materials from a slurry or liquid mixture. This magnetic separator features a rotating drum with a magnetic field and a concentrate overflow weir, similar to the co-current configuration. However, the slurry flow direction is opposite to the rotation of the drum, enhancing the efficiency of magnetic separation by allowing the particles to encounter the highest magnetic intensity at the point of the drum with the highest magnetic field strength.
