Abstracts

The global Countertop Refrigerated Display Cases market size is expected to reach \$ 5727 million by 2032, rising at a market growth of 5.7% CAGR during the forecast period (2026-2032).

Tabletop refrigerated display cases are small commercial refrigeration devices primarily used in coffee shops, bakeries, convenience stores, and restaurants to display and preserve beverages, desserts, sandwiches, and other foods at low temperatures. The upstream supply chain includes suppliers of compressors, refrigerants, glass, LED lighting, and metal components, while the downstream includes bakeries, coffee chains, convenience stores, restaurants, and other retail channels. In 2025, the global average price of tabletop refrigerated display cases was approximately US\$1,350 per unit, with sales of approximately 2.8 million units and global production capacity of approximately 3.4 million units, resulting in an industry profit margin of approximately 11%.

The market for countertop refrigerated display cases is expected to maintain steady growth in the future, primarily driven by the expansion of coffee chains, bakeries, and convenience stores. Increased consumer demands for better food display, energy efficiency, and intelligent temperature control will promote the widespread adoption of high-transparency glass, low-energy compressors, and intelligent temperature control systems. Meanwhile, miniaturization, multi-functionality, and the use of environmentally friendly refrigerants will also become important development directions for the industry.
