A countertop clear ice maker is an appliance used to make ice cubes on the countertop. These machines have transparent casings that clearly show the ice-making process. They work by pouring water into ice cube molds and then using a built-in refrigeration element to cool the water to the temperature required to make ice. The resulting ice cubes can be prepared quickly, with machines typically using vibrations or other mechanisms to release the cubes from the mold. These machines are compactly designed for use in home kitchens, with fast ice-making speeds and different capacity options.
