Abstracts

The global Couplings market size is expected to reach \$ 27210 million by 2032, rising at a market growth of 0.4% CAGR during the forecast period (2026-2032).

Coupling is a device used to connect two shafts together at their ends for the purpose of transmitting power. Couplings do not normally allow disconnection of shafts during operation, however there are torque limiting couplings which can slip or disconnect when some torque limit is exceeded.

Global Couplings key players include Siemens, Voith Turbo, SKF, etc. Global top three manufacturers hold a share over 5%.

China is the largest market, with a share about 25%, followed by Europe, and North America, both have a share over 45 percent.

In terms of product, Non-shifting Type is the largest segment, with a share over 60%. And in terms of application, the largest application is Papermaking, followed by Power Generation, Mining, etc.

This report studies the global Couplings production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Couplings and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
