According to our (Global Info Research) latest study, the global CPE-Based Impact Modifiers market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Chlorinated polyethylene or named CPE, made from HDPE by partial chlorination. Due to the presence of chlorine atoms, CPE has softness and certain rubber properties, making it a polar polymer with the same polarity as PVC, increasing the compatibility with PVC. CPE has the function of accelerating the melting and plasticizing of PVC. With the increase of CPE content, the plasticizing time shortens, the plasticizing torque and equilibrium torque increase, and the viscosity of the plasticized melt increases.
