According to our (Global Info Research) latest study, the global CPT Truck market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

CPT penetrating truck is a vehicle-mounted equipment used to test the mechanical properties of soil. Its full name is 'cone injection pressure tester'. Foundation design, CPT penetrating probe truck has stronger mobility and flexibility in the construction process than ordinary penetrating probe vehicles, and its test equipment can be loaded on the truck for remote construction, covering a wider area and higher testing efficiency. During the test, the CPT penetrating truck can maintain a certain construction speed, rotation speed and load when rapidly drilling into the ground and returning to ensure the accuracy and consistency of the test data. Therefore, it is widely used in the fields of engineering exploration and foundation design, and is a very important vehicle-mounted equipment.
