According to our (Global Info Research) latest study, the global Crack Sealing and Crack Filling market size was valued at USD 849.9 million in 2023 and is forecast to a readjusted size of USD 1105.5 million by 2030 with a CAGR of 3.8% during review period.

Sealing and/or filling cracks in existing pavement is the single the most effective procedure that can be performed to extend its lifecycle. By filling and sealing cracks water is prevented from penetrating beneath the asphalt surface where it causes the majority of distresses and failures by weakening the base and sub-base. Unsealed cracks also allow sand, dirt and other non-compressible substances to enter the cracks which interferes with the expansion and contraction of the pavement. This simple procedure is the most cost effective pavement maintenance technique and one that can greatly extend the life of asphalt pavement.
