Abstracts

The global Crank Drive Motor market size is expected to reach \$ 2595.4 million by 2029, rising at a market growth of 8.2% CAGR during the forecast period (2023-2029).

Crank drive motors are known for their superior efficiency and performance compared to hub motors. They provide a more natural riding experience by leveraging the bike's gears, which results in better climbing abilities, longer range, and faster acceleration. Crank drive motors are generally more energy-efficient, which can extend the battery range of an e-bike. This makes them appealing to riders who want to cover longer distances on a single charge. The global emphasis on sustainability and reducing carbon emissions is driving the adoption of electric bikes, and crank drive motors contribute to this trend by providing efficient and eco-friendly transportation options.
